

D:/Code/CCplot/source  
/prop/titleprop.h

```
graph TD; A["D:/Code/CCplot/source<br/>/prop/titleprop.h"] --> B["QObject"]; A --> C["QString"]; A --> D["QFont"];
```

The diagram illustrates a header file's dependencies. A central box at the top contains the file path 'D:/Code/CCplot/source /prop/titleprop.h'. Three blue arrows originate from the bottom of this box and point to three separate boxes below it, labeled 'QObject', 'QString', and 'QFont'. This indicates that the header file includes or depends on these three Qt classes.

QObject

QString

QFont
